

§ii – Option a) Two-Part Counterpoint

In the examination you will be given an extract of approximately 8-12 bars, of which all but approximately 4 bars will be in two-part counterpoint. In the remaining bars you may be given the upper or lower part, or even a few notes of each, or nothing, and you will be asked to complete the extract.

Do study with care the completed bars, as they will give clues to the rate of harmonic change, patterns and imitations used.

The following pages give help and guidelines on various procedures and devices which may occur.

[Link to practice exercises](#)

Study and preparation

Study, listen to and, preferably, play the Two-Part Inventions of J.S. Bach. Further examples can be found in the English and French Suites and the Short Preludes and Fugues written by Bach for beginners. The 48 Preludes and Fugues also contain some very good examples of two-part counterpoint.

The question set for this examination will be for keyboard or other instruments (e.g. two violins). The general principles of two-part counterpoint are fully explained (with examples) in the *LCM Theory Handbook Grade 6* (also Grade 7), and you should study them with care. Here, we give some hints on working questions, along with the addition of some 'tricks of the trade' and a suggested method of working.

Harmony

1. This must be clear. Do not employ an excessive rate of harmonic change. Quick tempi suggest fewer chords, whilst slower tempi may allow for more changes of chord per bar.
2. All discords should resolve correctly, but remember that the use of chromatic chords can make it difficult to produce 'running' parts.
3. Modulation to related keys can be used freely, especially in 'transient' form, but avoid remote keys, which are easy to move into but often awkward to leave in contrapuntal textures.

Part movement

It is important to remember that keyboard players cannot move over inordinately large leaps, whilst violinists are well able to deal with such leaps, as shown in Example 1 by J.S. Bach:

Obviously not all string music moves in this way, but the example shows how keyboard and string writing can differ. Crossing parts is best avoided in keyboard writing, but two violinists are free to do this with ease, for obvious reasons.

Some other considerations between keyboard and string writing are given below:

a) Keyboard

b) Strings

Example 2

The bracketed crotchets in 2a are better written for strings as shown in 2b.

a) Keyboard

b) Strings

Example 3

The crotchet D is better written for strings as a tied note, as shown in 3b.

a) Keyboard

b) Strings

Example 4

In this cadence the crotchet in 4a is better written for strings as two quavers – see 4b.

a) Keyboard or Voice

b) Cello

OR

Example 5

a) Keyboard or Voice

b) Cello

Example 6

Examples 5a and 6a show a bass part for voice or keyboard. 5b and 6b show how they are rhythmically amplified when played by a cello.

Realising the harmony

Look out for suspensions, whether tied or, as in Example 7, struck.

Example 7

S R S R O R

I iib V7 I

In bar 1 the quaver A is a suspension resolving to G.
 In bar 2 the quaver B \flat is a suspension which is ornamentally resolved.
 S = suspension. R = resolution. O = ornamental note.

As shown in Example 8, suspensions may move to another note of the resolution chord before the actual note of resolution.

Example 8

S * R S * R

Vb7 I V I

* = decorative note (another note of resolution chord). S = suspension. R = resolution.

Accented passing notes and appoggiaturas can produce problems if not spotted. If ignored they can produce poor harmony, but when treated properly they can produce a pleasant discord with a strong accent.

In Example 9 the accented passing notes are marked *, and the appoggiaturas +.

Example 9

+ + +

i V VI

Example 10

+ * + * + * + *

i V VI

The long note

Long notes can prove a problem: 'spinning out' a chord over three or four beats is not the best way, and neither is a change of harmony on each beat useful. Look at Example 11:

Example 11

The given semibreve D is harmonised here by using the figure in the melody at bar 2 (marked x). The use of struck suspensions (shown with dotted lines) produces discord and movement, through their ornamental resolution. Note the accented passing notes at *.

The use of unessential harmony in conjunction with 'long' notes is shown in Examples 12 and 13, below.

Example 12

In bar 2 the E \flat becomes a suspension on the third beat, and similarly with the F in bar 3, indicated by dotted lines.

Example 13

Here the long notes in the melody are decorated by the use of 7th chords, which are ornamentally resolved. At * the dominant 7th in third inversion is ornamentally resolved to Ib. At ** the secondary 7th on IV in third inversion is similarly treated, resolving to ii.

Shortening figures

When using imitation you may need to 'curtail', or shorten, the figure. This method may be used at any moment in a piece of music to facilitate cadences or modulation. Remember that imitation should be plentiful but may at times need to be short-lived. The opening of the figure needs to be present, but thereafter you can adapt the figure, omitting part of it or adapting it to move into a cadence. Example 14 demonstrates this process.

Example 14

Example 14 consists of four staves of musical notation in treble clef, key of D major (one sharp), and 2/4 time. Each staff shows a variation of a melodic figure. The first staff shows the full figure: a quarter note D4, eighth notes E4-F4, quarter note G4, eighth notes A4-B4, quarter note C5, eighth notes B4-A4, quarter note G4, eighth notes F4-E4, quarter note D4. The second staff shows the first three notes (D4, E4-F4, G4) followed by a quarter rest. The third staff shows the first three notes followed by a quarter note A4. The fourth staff shows the first three notes followed by a quarter note G4. All staves end with a double bar line.

Imitation

The opening imitation may be as given in Example 15, i.e. at one bar's distance. The interval of imitation here is a perfect 4th below the initial melody.

Example 15

Example 15 shows a melodic line in treble clef, key of D major, and 6/8 time. The first bar contains a quarter note D4, followed by eighth notes E4-F4, quarter note G4, eighth notes A4-B4, quarter note C5, eighth notes B4-A4, quarter note G4. The second bar contains a quarter rest, followed by eighth notes D4-E4, quarter note F4, eighth notes G4-A4, quarter note B4, eighth notes C5-B4, quarter note A4. Brackets above and below the staff connect the notes of the first bar to the corresponding notes of the second bar, illustrating a perfect 4th interval of imitation.

Example 16 shows the same imitation but now at a half-bar distance. This is an effective way of enhancing the tension in the writing. Here, the interval of imitation is a perfect 5th below the initial melody and the intervals in the answering phrase are adapted in bar 2.

Example 16

Example 16 shows a melodic line in treble clef, key of D major, and 6/8 time. The first bar contains a quarter note D4, followed by eighth notes E4-F4, quarter note G4, eighth notes A4-B4, quarter note C5, eighth notes B4-A4, quarter note G4. The second bar contains a quarter rest, followed by eighth notes D4-E4, quarter note F4, eighth notes G4-A4, quarter note B4, eighth notes C5-B4, quarter note A4. Brackets above and below the staff connect the notes of the first bar to the corresponding notes of the second bar, illustrating a perfect 5th interval of imitation.

A useful method

1. Study the given opening.
 - What is the rate of harmonic change? (This is related to tempo.)
 - What are the modulations?
 - What are the cadences?
2. Determine which notes are 'unessential'.
3. Fit in any points of imitation.
4. Consider the use and position of any rests.
Remember that, in terms of harmony, a chord used with a rest lasts until the next strong beat.
(See Example 17.)

Example 17 

5. Look for features which may re-occur:
 - If there are suspensions in the given opening, use them again.
 - If there are rests in the given opening, use them again.
 - If there are accented passing notes in the given opening, use them again.

Remember that good contrapuntal writing is always based on a strong and clear harmonic progression.

Rhythmic devices

a. Syncopation

This occurs when the accent is placed on a weaker beat of the bar, or on the weaker part of a beat.

In Example 18 the accent is placed on the weak beats of the bar:

Example 18a

Further guidelines

The examination question will consist of approximately 8-12 bars of 2-part counterpoint, and you will be asked to complete 4 bars.

Always look at the whole example in order that you may capture the style. Also look at the rate of harmonic change, the modulations and the use of unessential harmony (suspensions, auxiliary notes, changing notes, and accented and unaccented passing notes). If writing for string or wind instruments, make sure that you are familiar with their playing ranges.

Remember the general rule that if the given part moves, the other voice should 'stand still', and *vice versa*. Also remember that too many changes of chord can make voice leading and melodic contour rather awkward – the given parts will give clues to this.

Good counterpoint is borne out of clear harmonic progressions. Accidentals (often unessential notes) can mislead you into using chromatic harmony. Although this may occasionally happen, it can lead to unmusical patterns and movement.

Practice exercises

Complete the following 2-part examples, paying particular attention to any points of imitation.

1.

Keyboard

A

5

x

x

x

x

B

9

etc.

Note the imitation at the opening, marked A. Beginning in D minor, the opening 8 bars end with a perfect cadence in F major (the relative major). Bars 4-8 are interesting in that the given part contains a flow of semiquavers, some of which are lower and upper auxiliary notes (marked x), and arpeggiated harmony notes (marked with dotted lines).

You are asked to complete the bass line in the section marked B. Note the rests in bars 6 and 7: these could feature in Section B – perhaps on the first quaver beat of bars 9, 10 and 11.

Although there are no accidentals, the melodic shape at the end indicates V7 – I in B \flat , allowing us to end here in the relative major (B \flat) of the subdominant minor (G).

2.

The above extract is for two violins; remember that the lowest note on the violin is G below Middle C. In string writing it is quite common for parts to cross, but here the 1st violin part is quite high and there would therefore be no point in crossing the parts.

Notice in the opening bars that when one part has a long note, the other part moves.

You are asked to complete the 2nd violin part in Section B, and just before it. Also, to complete the imitation in the 1st violin in bar 3.

In Section A, the imitation is obvious; however, in Section B the given part moves mostly in semiquavers, so the added part would be more sedate, although a small amount of imitation could occur, as shown below. The effect of this would be enhanced by the use of rests immediately beforehand. (NB the figure is slightly altered at *.)

The given final bar indicates that the phrase ends in the relative minor (D minor), so the introduction of a C \sharp in the penultimate bar would confirm this.

3. Fiocco

Keyboard

A

B

etc.

In this example in duple time, there seems to be less movement – the rate of harmonic change could be two chords to the bar for the most part.

Remember, if a note leaps, it must be a harmony note – see *. The repeated notes (e.g. bars 5-6) are unessential notes, in this case struck suspensions of short value.

Arpeggio harmony patterns are indicated by dotted lines. Not all quavers need to be harmonised, as some are passing notes (circled). The groups numbered 1-4 could contain accented passing notes, depending on the chosen harmony.

Note the modulation at the end, preparing the way for a perfect cadence in A minor – the dominant minor.

Complete the lower part.

Further exercises

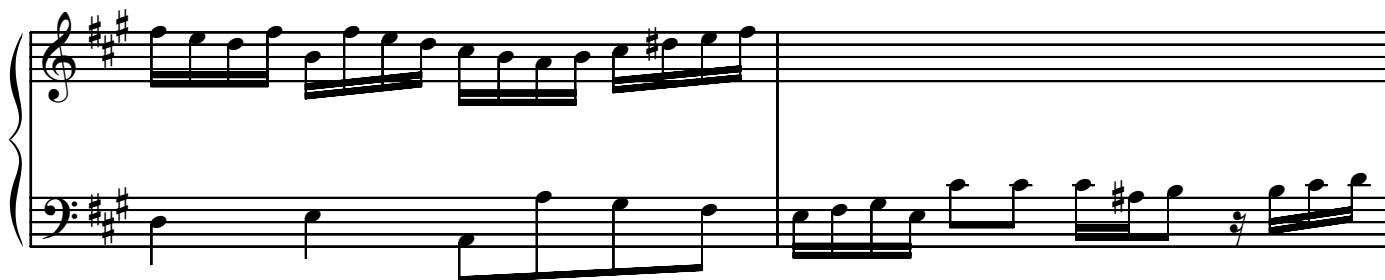

The following extracts will give you further practice. In longer extracts, bracketed sections marked A and B indicate the kinds and lengths of portions which candidates will be asked to complete in the DipMusLCM examination.

Complete these two-part examples, paying particular attention to any points of imitation.

4.

J. S. Bach

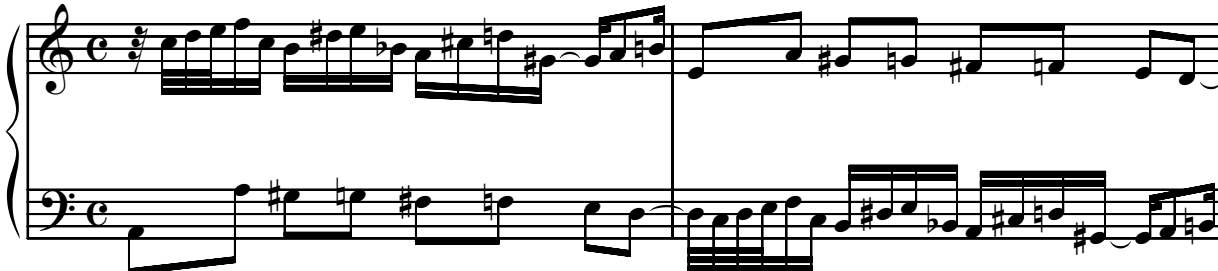

Keyboard

5.

J. S. Bach

Keyboard

First system of musical notation, consisting of a treble clef staff and a bass clef staff. The treble staff begins with a quarter note, followed by a series of eighth notes and sixteenth notes. The bass staff contains a sequence of quarter notes.

Second system of musical notation, continuing the piece. It features a treble clef staff with a melodic line and a bass clef staff with a supporting line. The system concludes with the word "etc." in the right margin.

6. J. S. Bach

Keyboard

First system of musical notation for a piece by J.S. Bach, labeled "Keyboard". It is in 3/4 time and features a treble clef staff with a melodic line and a bass clef staff with a supporting line. A bracket labeled "A" spans the first two measures of the treble staff.

Second system of musical notation for the piece by J.S. Bach. It continues the melodic and harmonic development. A bracket labeled "B" spans the final two measures of the treble staff.

Third system of musical notation for the piece by J.S. Bach, concluding with the word "etc." in the right margin.

9.

J. S. Bach

Keyboard

The first system of exercise 9 consists of two staves. The treble staff begins with a quarter rest, followed by a quarter note G4, a quarter note A4, and a quarter note B4. The bass staff begins with a quarter note G3, a quarter note A3, and a quarter note B3. The system concludes with a quarter note G4 in the treble and a quarter note G3 in the bass.

The second system of exercise 9 consists of two staves. The treble staff contains a sequence of eighth notes: G4, A4, B4, C5, B4, A4, G4, F4, E4, D4, C4, B3, A3, G3. The bass staff is empty.

The third system of exercise 9 consists of two staves. The treble staff contains a sequence of notes: G4, A4, B4, C5, B4, A4, G4, F4, E4, D4, C4, B3, A3, G3. The bass staff contains a sequence of notes: G3, A3, B3, C4, D4, E4, F4, G4, A4, B4, C5, B4, A4, G4. The system concludes with the word "etc." on the right.

10.

J. S. Bach

Allegro

Keyboard

The first system of exercise 10 is marked "Allegro" and consists of two staves. The treble staff begins with a quarter note G4, followed by eighth notes A4, B4, C5, B4, A4, G4. The bass staff is empty.

The second system of exercise 10 consists of two staves. The treble staff contains a sequence of notes: G4, A4, B4, C5, B4, A4, G4, F4, E4, D4, C4, B3, A3, G3. The bass staff is empty.

The third system of exercise 10 consists of two staves. The treble staff contains a sequence of notes: G4, A4, B4, C5, B4, A4, G4, F4, E4, D4, C4, B3, A3, G3. The bass staff contains a sequence of notes: G3, A3, B3, C4, D4, E4, F4, G4, A4, B4, C5, B4, A4, G4. The system concludes with the word "etc." on the right.

12.

Telemann

Vivement

Keyboard

First system of a musical score for piano. The right hand (treble clef) features a melodic line with a trill (tr) on the final note. The left hand (bass clef) is mostly silent.

13.

Telemann

Second system of the musical score, labeled "13." and "Telemann". The tempo is marked "Allegro". The instrument is labeled "Keyboard". The right hand (treble clef) has a melodic line, and the left hand (bass clef) has a rhythmic accompaniment.

Third system of the musical score. It begins with a section marked "A". The right hand (treble clef) has a melodic line with a trill (tr) on the final note. The left hand (bass clef) has a rhythmic accompaniment.

Fourth system of the musical score. It begins with a section marked "B". The right hand (treble clef) has a melodic line with a trill (tr) on the final note. The left hand (bass clef) has a rhythmic accompaniment.

Fifth system of the musical score. The right hand (treble clef) has a melodic line with a trill (tr) on the final note. The left hand (bass clef) has a rhythmic accompaniment.

14.

Allegro

Handel

Keyboard

Musical score for exercise 14, Handel, Allegro, 3/8 time signature. The score is written for keyboard and consists of three systems. The first system includes a treble clef with a key signature of two flats and a 3/8 time signature. The right hand plays a series of eighth notes, while the left hand plays a bass line with some rests. A first ending bracket labeled 'A' spans the final two measures of the first system. The second system continues the piece with similar rhythmic patterns. The third system concludes with a second ending bracket labeled 'B' and a final cadence.

15.

Adagio

Handel

Keyboard

Musical score for exercise 15, Handel, Adagio, 3/4 time signature. The score is written for keyboard and consists of two systems. The first system includes a treble clef with a key signature of two flats and a 3/4 time signature. The right hand features a melodic line with dotted rhythms, while the left hand provides a simple bass line. The second system continues the piece, ending with a final cadence.
